PROFILE

Computer Science graduate from Pharos University in Alexandria (CGPA 3.88 / 4.00, Excellent with Honors). I studied in English and did best in statistics, machine learning and data science courses. I have worked on data science projects since 2023 and spent the last year as a Teaching Assistant. Now I want to focus on data science, statistics and machine learning.

EDUCATION

B.Sc. in Computer Science, Pharos University in Alexandria 2021 to 2025

Faculty of Computer Science and Artificial Intelligence, taught and assessed in English
CGPA: 3.8836 / 4.00 (92.13%), Excellent with Honors, 140 credit hours, graduated July 2025
Graduation project: BloomTech, smart agriculture system (grade A)

- Data and AI: Data Science Methodology (94), Introduction to AI (94), Machine Learning (93), Introduction to Data Sciences (93), Intelligent Systems (91), Bioinformatics Programming and Scripting (91), Healthcare Database Systems (A)
- Maths: Probability and Statistics (97), Linear Algebra (95), Calculus II (93), Theory of Computation (91), Numerical Computations (88), Discrete Structures (87)
- Computing: Algorithms Design (97), Programming II (97), Compiler and Language Theory (94), Database Systems (93), System Programming (93), Data Structures and Algorithms (92)

EXPERIENCE

Teaching Assistant, Pharos University in Alexandria Oct 2025 to Oct 2026

Researcher Teaching Assistant, Faculty of Computer Science and Artificial Intelligence

Data Science Intern (online), WorldQuant University Jan 2023 to Dec 2024

- Completed data science projects in Python: loading and cleaning messy CSV data with pandas, exploring it with plots and heatmaps, and building machine learning pipelines with feature encoding and imputation

Node.js Intern, Route Jul 2024 to Sep 2024

Embedded Systems Intern, Information Technology Institute (ITI) Jul 2024 to Aug 2024

International Account Advisor, Vodafone UK, _VOIS Jun 2023 to Dec 2023

- Worked with Vodafone UK customer accounts, in English

PROJECTS

BloomTech: Smart Agriculture System (graduation project) Sep 2024 to Jul 2025

Image processing, Flutter, Firebase, IoT sensors, solar power

- A system for smart pots and farm land that detects plant diseases from photos and suggests a cure. The detection reached over 90% accuracy on more than 1,000 test images
- Flutter app with live sensor readings, smart irrigation control, plant care tips, and services such as renting tools and ordering seeds
- Solar powered IoT sensors, so the pots and field sensors work without batteries

Bitcoin Price Prediction Oct 2024 to Dec 2024

Python, pandas, LSTM, ARIMA, Random Forest, Plotly

- Compared ARIMA, Random Forest and LSTM models on historical Bitcoin data. LSTM gave the best results, with about 18% lower RMSE than the baseline
- Added features such as rolling averages and RSI, tuned the models with cross validation, and showed the forecasts in an interactive dashboard
- Received Top Project Recognition at the faculty project showcase

CERTIFICATES AND COURSES

- IBM (Cognitive Class, 2022): Data Science 101, Data Science Methodology, Python 101 for Data Science, Data Analysis with Python, SQL and Relational Databases 101; IBM badges: Data Science Foundations Level 1, Data Analysis Using Python
- AWS (2022): Machine Learning Essentials for Business and Technical Decision Makers; Fundamentals of a Modern Data Strategy; Modern Applications on AWS
- LinkedIn Learning (2022): Build Your Analytical Skills with Statistical Analysis (learning path); SQL for Exploratory Data Analysis
- DataCamp (2022): Introduction to Python, Intermediate Python, Introduction to SQL, Intermediate SQL Queries
- Artificial Intelligence in Healthcare, Children's Cancer Hospital Egypt 57357 (2023); C++ Programming, Unihance (2023); Database Fundamentals, ITI Mahara-Tech (2022); Entrepreneurship, Cisco Networking Academy (2022)

COMPETITIONS

- ICPC ECPC Qualifications 2022 (Collegiate Programming Contest), team from Pharos University

LEADERSHIP AND VOLUNTEERING

- Head of PR, TEDx PUA (2024 to 2025); Head of HR, Hult Prize PUA (2024 to 2025); Head of HR, GDSC PUA (2024 to 2025)
- Head of Operations, IEEE PUA (2022 to 2024); Vice President, Rally PUA (2023 to 2025); TIEC Ambassador (2024); AIESEC in Egypt member (2024); Head of Arts, PUA Student Union (2021 to 2022)

SKILLS

Programming: Python, SQL, Java, C, C++, JavaScript, Dart
Data and ML: pandas, NumPy, regression, classification, SVM, k-means, KNN, LSTM, ARIMA, statistics, SAS
Visualisation: Matplotlib, Seaborn, Plotly, Tableau, Power BI, Looker Studio, Excel and Power Query
Databases and tools: SQL Server, MongoDB, Firebase, Flutter, Node.js, Git

LANGUAGES

Arabic (native), English (fluent, my whole degree was taught and assessed in English)
