PROFILE

Computer Science graduate from Pharos University in Alexandria (Excellent with Honors). I studied in English, enjoyed the machine learning and maths courses the most, and spent the last year as a Teaching Assistant. I also build web apps in my free time and freelance as a developer. Now I want to focus on data analytics and machine learning.

EDUCATION

B.Sc. in Computer Science, Pharos University in Alexandria 2021 to 2025

Faculty of Computer Science and Artificial Intelligence, taught in English
CGPA: 3.7621 / 4.00 (88.99%), Excellent with Honors, 140 credit hours
Graduation project: Mentoro (grade A)

- Machine Learning (94), Data Science Methodology (90), Intelligent Systems (89), Introduction to AI (85), Introduction to Data Sciences (82), Robotics (96)
- Numerical Computations (97), Linear Algebra (91), Discrete Structures (89), Probability and Statistics (87), Calculus II (84)
- Compiler and Language Theory (97), Healthcare Database Systems (95), System Programming (94), Advanced Programming (91)

High School Diploma, El Quds American School, Alexandria 2021

GPA: 3.9 / 4.0

EXPERIENCE

Teaching Assistant, Pharos University in Alexandria Nov 2025 to Sep 2026

- Taught labs for Programming 1, System Programming, Compiler Design and Human-Computer Interaction (Figma and Flutter)
- Prepared lab sheets, quizzes and practical exams and graded student projects
- Helped review exam blueprints for several CS courses as part of the faculty's quality work

Full Stack Developer (Freelance), Sublime+ Aug 2026 to now

- Built the company website (sublime-plus.com) with Next.js, hosted on Vercel and Cloudflare, and set up Search Console and Analytics
- Made an interactive 3D mascot for the landing page with React Three Fiber and cut the model size from about 70 MB to 10 MB
- Tested and compared image and video generation models for the team (quality, cost, speed)

PROJECTS

Mentoro: One-to-One Guidance Platform with AI Assistance for Adaptive Course Recommendation 2024 to 2025

Graduation project, team of six, supervised by Dr. Soha Ahmed. Live at mentoro2.vercel.app

- A mentoring platform that suggests courses, tasks and mentors to learners based on their goals and progress
- I designed the whole UI/UX in Figma and worked on the frontend (Next.js, TypeScript, Tailwind CSS): home page, profiles and mentor and mentee connections

Image Generation with Diffusion Models Python

- Trained a diffusion model to generate images on the CIFAR-10 dataset

BuildFin 2026

- Web app for building owners to record residents' payments, see monthly totals and track expenses (building11.vercel.app)

Nour HR 2026

- Arabic and English HR system for a pharmacy with login and staff records (hr-pharmacy-nine.vercel.app)

Ozouma (in progress) 2026

- Hands-free cooking app in Arabic and English: say "next" to move between steps, timers start by themselves and the screen stays on. Website in Next.js and a Flutter app

CERTIFICATES AND COURSES

- Cisco CCNA: Introduction to Networks; Switching, Routing and Wireless Essentials; Enterprise Networking, Security and Automation (Skills Plus Egypt, 2025)
- Back-End Development Diploma (.NET Core), Route Academy (2024)
- innovEgypt program, ITIDA and TIEC: 45 hour course and a startup project
- ST Smart Robotics with AI summer program (2023)

COMPETITIONS AND EVENTS

- ICPC ECPC Qualifications 2023: Honorable Mention. Took part again in 2024
- AUF Regional Hackathon on Artificial Intelligence (March 2023)
- Symposium "AI and the Research Frontier", Pharos University (February 2026)

SKILLS

Programming: Python, TypeScript, JavaScript, C#, SQL, Dart
Data and ML: machine learning basics, statistics, data preparation, Jupyter
Web: Next.js, React, Tailwind CSS, .NET Core, Supabase, MongoDB, SQL Server
Design: Figma, UI/UX, Blender
Tools: Git and GitHub, Vercel, Cloudflare

LANGUAGES

Arabic (native), English (fluent, my whole degree was in English)
