Application Record: University of Hildesheim

International Master in Data Analytics | Application form: ismll.uni-hildesheim.de/apply/app/new/112 | Status: filled in, not yet submitted

To check before submitting

- Last name currently shows " Said" (with a space). Your full last name on your documents is "Mohamed Issa Mohamed Said". Fix it so it matches your passport.
- Phone and mobile show +2001062100482. The international format for Egypt is +20 1062100482 (remove the extra 0 after 20).
- School certificate: date issued and mark achieved are still empty, and the school certificate PDF is not uploaded.
- English proficiency: date issued is empty.
- Minimum pass marks (2.0 GPA overall, 50% per course) and the start date (01-10-2021) were my best estimates. Confirm them.
- Password, data protection checkbox and all file uploads are done by you.

Personal information

First name	Mayar
Last name	Mohamed Issa Mohamed Said (check the form, see above)
Gender	female
Date of birth	08-02-2003
Place of birth	Alexandria
Country of birth	Egypt
Citizenship	Egypt
Already matriculated at Hildesheim	No (unchecked)
Accepted to this program last semester	No

Contact information

Street address	9 Suez Canal Street, Moharam Bek, Alexandria
ZIP code	21515
City	Alexandria
Country	Egypt
Email	Myar.issa2003@gmail.com
Phone / Mobile	+2001062100482 (see check above)

University entrance certificate

Name of certificate	University Entrance Certificate
Name of school	El Quds American School
City / Country	Alexandria, Egypt
Date issued	(empty)
Mark achieved	(empty)

DA advanced track

Apply for the advanced track	No (it needs 30 credits of core ML courses and an ML thesis)

Prior studies #1 (used for weighting)

Country	Egypt
University	Pharos University in Alexandria
College	Faculty of Computer Science and Artificial Intelligence
Degree	Bachelor of Science
Subject	Computer Science
Status	passed
Start date	01-10-2021
End date	28-07-2025
Credits so far / required	140 / 140
Grading scheme	gpa 4-1
Best mark / minimum pass	4.0 / 2.0
Mark achieved	3.7621
Mark comment	Excellent with Honors (88.99%)
Vacation terms / internship terms	0 / 0
Completely English program	Yes

Graduation project

Title	Mentoro: One-to-One Guidance Platform with AI Assistance for Adaptive Course Recommendation
Mark	4.0 (A in Project I and Project II)
Credit points	6

Abstract

Self-directed learning is flexible, but learners often struggle with low motivation, unclear learning paths and a lack of personalised support, and MOOC platforms rarely offer real human guidance. Mentoro is an AI-powered e-mentoring platform that combines structured one-to-one mentorship with intelligent personalisation. Learners request mentorship for a specific task or field, and mentors guide them one to one or in groups through instant messaging, calls and discussion forums. AI modules recommend courses, tasks and suitable mentors based on each learner's performance, preferences and goals, and generate custom learning roadmaps and quizzes. A gamification layer (badges, leaderboards, streaks and progress dashboards), mentor reviews and a community space keep learners engaged. The system uses a .NET Core and Entity Framework Core backend with SQL Server, a Next.js web frontend and a Flutter mobile app. A survey showed that over 96% of respondents value mentor-supported learning.

Our team of six built the platform. I designed the full UI/UX in Figma and worked as a Frontend Developer, building the home page, user profiles and the mentor and mentee connections with Next.js, TypeScript and Tailwind CSS, focusing on a responsive, accessible and scalable interface. Live platform: https://mentoro2.vercel.app/

Related courses: grading

Grading scheme (individual courses)	percentage
Best possible / minimum pass	100 / 50
Workload unit	Credits (credit hours from the transcript)

Data analytics courses (mark, credits)

Machine Learning	94, 3
Introduction to Artificial Intelligence	85, 3
