Abstract

Mentoro is a web platform that connects learners with mentors and uses AI to adapt the learning path. Learners ask for mentorship on a specific task or field, mentors guide them one to one or in groups, and AI modules recommend courses, tasks and suitable mentors based on each learner's progress, preferences and goals. It also includes learning roadmaps, quizzes, gamification and a chatbot. Stack: .NET Core and SQL Server backend, Next.js web frontend, Flutter mobile app. I designed the full UI/UX in Figma and built the home page, profiles and mentor and mentee connections in Next.js, TypeScript and Tailwind CSS. Grade: A.
