PROFILE

Computer Science graduate from Pharos University in Alexandria with Excellent with Honors (CGPA 3.76 / 4.00), studied fully in English. My strongest courses were machine learning and the maths behind it. I spent a year teaching labs as a Teaching Assistant and I build and ship full stack web apps, from the Figma design to the live site. I now want to go deeper into machine learning and data.

EDUCATION

B.Sc. in Computer Science, Pharos University in Alexandria Oct 2021 to Jul 2025

Faculty of Computer Science and Artificial Intelligence, taught and assessed in English

CGPA 3.7621 / 4.00 (88.99%), Excellent with Honors, 140 credit hours. Graduation project: Mentoro (grade A)

- **AI and data:** Machine Learning (94), Data Science Methodology (90), Intelligent Systems (89), Robotics (96), Introduction to AI (85), Introduction to Data Sciences (82)
- **Mathematics:** Numerical Computations (97), Linear Algebra (91), Discrete Structures (89), Probability and Statistics (87), Calculus II (84)
- **Computing:** Compiler and Language Theory (97), Software Quality and Testing (95), Healthcare Database Systems (95), System Programming (94), Advanced Programming (91)

High School Diploma, El Quds American School, Alexandria 2021

GPA 3.9 / 4.0

EXPERIENCE

Teaching Assistant, Pharos University in Alexandria Nov 2025 to Sep 2026

Faculty of Computer Science and Artificial Intelligence

- Ran weekly labs for Programming 1, System Programming, Compiler Design and Human-Computer Interaction (Figma and Flutter)
- Wrote lab sheets, self-study packets, quizzes and practical exams, and graded labs and student projects
- Helped the faculty's quality team check exam blueprints for several CS courses against each topic's contact hours

Full Stack Developer (Freelance), Sublime+ Aug 2026 to now

AI marketing and content agency with clients in the US, Europe and the Middle East

- Built and launched the company website (sublime-plus.com) in Next.js on Vercel and Cloudflare, with Search Console, Analytics and a working sitemap
- Added an interactive 3D mascot with React Three Fiber and cut the 3D model from about 70 MB to 10 MB (Draco compression, JPEG textures) so the page loads fast
- Tested and compared image and video generation models on quality, cost and speed, and presented recommendations to the team

PROJECTS

Mentoro: One-to-One Guidance Platform with AI Assistance for Adaptive Course Recommendation 2024 to 2025

Graduation project, team of six, supervised by Dr. Soha Ahmed, live at mentoro2.vercel.app

- Mentoring platform that recommends courses, tasks and mentors to learners based on their goals and progress, with roadmaps, quizzes and a chatbot
- Designed the full UI/UX in Figma and built the web frontend parts I owned (home page, profiles, mentor and mentee connections) in Next.js, TypeScript and Tailwind CSS

BuildFin: building finance app 2026

- Lets a building owner record residents' payments, see monthly totals and track expenses like electricity and elevator maintenance (building11.vercel.app, MongoDB)

Nour HR: pharmacy HR system 2026

- Arabic and English HR system for a pharmacy with sign-in and staff records (hr-pharmacy-nine.vercel.app)

Ozouma: hands-free cooking app (in progress) 2026

- Arabic and English recipe app where you say "next" to move between steps, timers start by themselves and the screen stays on. Next.js website and Flutter app

CERTIFICATES AND COURSES

- Cisco CCNA: Introduction to Networks; Switching, Routing and Wireless Essentials; Enterprise Networking, Security and Automation (Skills Plus Egypt, 2025)
- Back-End Development Diploma (.NET Core), Route Academy (2024)
- innovEgypt program, ITIDA and TIEC: 45 hour course and a startup project
- ST Smart Robotics with AI summer program (2023)

COMPETITIONS AND EVENTS

- ICPC ECPC Qualifications 2023: Honorable Mention, and took part again in 2024
- AUF Regional Hackathon on Artificial Intelligence (March 2023)
- Symposium "AI and the Research Frontier", Pharos University (February 2026)

SKILLS

Programming: Python, TypeScript, JavaScript, C#, SQL, Dart
Data and ML: machine learning fundamentals, statistics, data preparation and analysis in Python
Web and backend: Next.js, React, Tailwind CSS, .NET Core, Supabase, MongoDB, SQL Server
Design: Figma, UI/UX, Blender
Tools: Git and GitHub, Vercel, Cloudflare

LANGUAGES

Arabic (native), English (fluent, my whole degree was taught in English)
