Application Record: LMU Munich

M.Sc. Statistics and Data Science, summer semester 2027 (start April 2027) | Online application (LimeSurvey with your personal token link) | Status: filled in, not yet submitted

To check before submitting

- Update 2 boxes in the form: Motivation (how you focused on statistics) and Non-academic activities, with the texts below (updated texts).
- Deadline for this application: 15 November 2026, 11:59 pm CET. Submit is final.
- Upload all files yourself (each under 10 MB).
- German grade: 1.7 was entered from 88.99%. Run LMU's grade conversion tool and change it if it gives a better result (about 1.2 to 1.4 from the GPA).
- After submitting: central LMU application opens 2 December 2026, International Office deadline 15 January 2027.
- Selection: 20 point score. 18 to 20 direct admission, 10 to 17 written test (2 weeks) and a 15 minute interview, 0 to 9 rejected. Results end of November / early December, test results early January.

Personal details

Date of birth	2003-02-08
Place of birth	Alexandria
Country of birth	Egypt
Birth name	(empty)
Nationality	Egyptian
Address	entered by you
Telephone	entered by you

Academic career

Undergraduate program	Computer Science
University	Pharos University in Alexandria, Alexandria, Egypt
Type of degree	Bachelor of Science (B.Sc.)
Minor	(empty)
Specialization or focus	(empty)
Certificate issued	Yes
Further degrees	No

Motivation: why this program

During my Computer Science degree, the courses I enjoyed most were Machine Learning (94) and the maths courses behind it. In my graduation project, a platform that recommends courses and mentors to learners, I saw that the hard part was not the code but the data: how to measure progress and how to know if a recommendation is actually good. I want to understand the statistical side of this properly, not just use ready models. LMU's program is strong in exactly that, with statistical learning, modelling and a lot of practical work, and it is taught in English, which fits my background. My goal is to work on data and recommendation problems, maybe in education.

Motivation: how you focused on statistics

My degree was in Computer Science, but I took the statistics and data related courses available to me: Probability and Statistics (87), Linear Algebra (91), Numerical Computations (97), Calculus I and II, Introduction to Data Sciences (82), Data Science Methodology (90), Machine Learning (94) and Intelligent Systems (89). In these courses I worked with data preparation, model evaluation and basic statistical methods, mostly in Python. In my graduation project I also worked with user survey data. I know my statistics background is lighter than a statistics graduate's, so I am ready to study extra and I would welcome the written test.

Degree certificate

Date of degree	2025-07-28
Diploma file	Mayar_Issa_Diploma.pdf

Transcript of Records

File	Mayar_Issa_Transcript.pdf

English skills

School or undergraduate studies in English	Yes
Proof file	Graduation statement.pdf

Knowledge (ECTS: 3 credit hours = 5 ECTS, 2 credit hours = 3.5 ECTS)

Descriptive Statistics	MATH 201: Probability and Statistics (3.5 ECTS)
Statistical Modelling	DS 302: Data Science Methodology (5 ECTS)
Statistical Modelling (second)	CS 207: System simulation and modelling (5 ECTS)
Statistical Inference	(empty)
Principles of Machine Learning	AI 301: Machine Learning (5 ECTS)
Principles of Machine Learning (second)	AI 201: Intelligent Systems (5 ECTS)
Probability theory	MATH 201: Probability and Statistics (3.5 ECTS)
Linear Algebra	MATH 202: Linear Algebra (3.5 ECTS)
Mathematical analysis	MATH 102: Calculus II (3.5 ECTS)
Statistical Software and programming	DS 102: Introduction to Data Sciences (5 ECTS)
Statistical Software and programming (second)	MATH 301: Numerical Computations (3.5 ECTS)

Additional knowledge (thesis)

My graduation project, Mentoro, was a mentoring platform that recommends courses, tasks and mentors to learners based on their goals, progress and preferences. We also ran a user survey to validate the idea and analysed the answers. I designed the interface and built part of the web frontend.

Non-academic activities

Teaching Assistant, Pharos University (Nov 2025 to Sep 2026): taught programming and system programming labs.
Freelance developer at Sublime+ (since Aug 2026): tested and compared image and video generation models on quality, cost and speed.
ST Smart Robotics with AI summer program (2023), AUF Regional AI Hackathon (2023).

Grade

Grade in German system	1.7 (check with the conversion tool)
Grade in your system	CGPA 3.7621 / 4.00 (88.99%), Excellent with Honors

Additional information

Structured program or scholarship applied for	(empty)

Anything else to tell us

My university uses a 4.0 GPA scale and percentages. My final CGPA is 3.7621 / 4.00 (88.99%), which is "Excellent with Honors". My whole bachelor's degree was taught and assessed in English, as confirmed in the Graduation Statement I uploaded.
